Want to bridge digital divide through R&D?

http://spoken-tutorial.org

Are you tired of working for IT and other professional companies? Do you want to join a project that aims at making India IT literate through technology? Do you want to contribute to or learn from a project that aims to bridge the digital divide? If so, join the Spoken Tutorials project.

Spoken Tutorials are a proven method to impart IT literacy through a self learning mode. The 21 minute spoken tutorial available at http://spoken-tutorial.org/what_is_a_spoken_tutorial explains the spoken tutorial technology.

We have several openings for this project: project manager, technology developers, system administrators, computer programmers, script writers and people who have experience in audio-video recording. We are also looking for people who can create spoken tutorials on open source software.

For all the posts mentioned below, people with lower qualification or lower experience may be considered for a lower position with a lower salary. We can also accommodate people who can work remotely or part time. It is possible to participate in this project through the delivery based approach also.

In all the posts announced here, preference will be given to people who create and submit a ten minute spoken tutorial at the time of interview. Our staff members will be happy to assist you in creating a spoken tutorial. Our contact information is given in the 21 minute video mentioned above.

We hope to create 10,000 spoken tutorials of ten minute duration and dub them into 20 Indian languages. This will cover a few hundred FOSS systems.

Join the spoken tutorials project for IT literacy drive and help bridge the digital divide!

Positions of Research Assistant (RA1), System Administrator (SA), Editorial Assistant (EA), Programmer (PRG), Project Manager (PM1), Video Editor (VE), Executive Officer (EO), Project Manager (Technical) (PMT) are available in the following projects.
