# ARCquad

**Aim:** ARCquad is a strategy based board game where the players have to create an arc of four pawns in a linear fashion. The game has been designed with a traditional Indian theme giving it a royal feel. The simple rules with complex strategies make the game interesting for all age groups. The game is quick to learn.

**Game Play:** The board has been created by cross intersecting arcs on which the players take turns to enter their pawns, working towards making a linear formation of 4 pawns or restricting the opponents from making theirs. Since a pawn can travel all throughout an arc in a single chance, the players find it hard to predict the next move of the opponent.

# ARCquad (advance)

**Level Two:** The second level of the game increases the complexity of the game with more intersecting arcs. Expert players can use the rare side of the same board for this complex game play.

**Number of Players:** 2

**Age Group:** 12yrs and above

**Material:**

Board – Laser etched wooden board with side beading

Pawns – Carved stones, two colours

Size: 260 mm x 400 mm
