Double Block

Aim: Double block is a strategy + fun game to increase the interaction among children playing it.

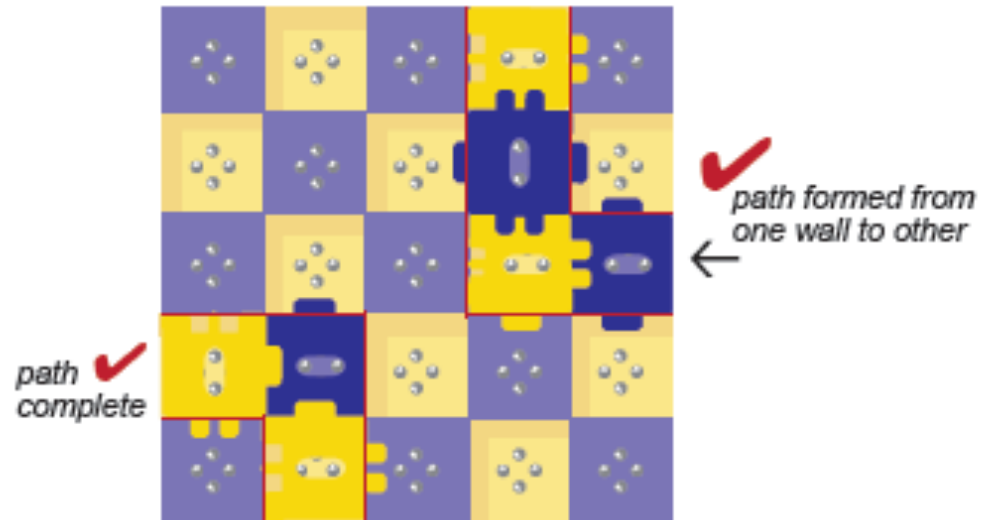

Game Play: The aim of the game is to collect maximum blocks by forming paths that touch the edge of the board. The game has 2 coloured blocks (yellow, blue) and players have to place them on the chequered board by matching the two colours. There are red pieces too which like master- pieces can be placed anywhere.

Players play by taking chances to draw blocks from the lot without seeing the shapes and placing them on the board to form a path. Positive and negative contours of the edges permit you to connect only the matching blocks together. He/she who places the last block of the path gets all the blocks in that path. This game is both luck based (drawing from the lot) and strategy based (forming or blocking paths) hence challenging and engaging players to outdo one another.

fit yellow pieces with blue and vice-versa

Number of Players: 2 players or more

Age Group: 8 yrs and above

Material:

Board – Acrylic base

Block pieces – 39 yellow and blue block pieces , 10 red block pieces (Acrylic, laser cut).
