The Magical Pyramid

Aim: The Magical Pyramid is a game based on Egyptian Pyramids. The ultimate aim is to reach the top of the pyramid before other players.

Game Play: The pyramid has five layers and the top four rotate on an axis in either direction. Each layer has three levels to climb making total of fifteen levels.

Every player can choose to either roll the die and move their piece accordingly (forward, backward or sideways not jumping more than one level at one time) or rotate any collective layer of the pyramid by 90 degrees. The choice of this decision is key to the strategy that he wants to employ. He can block progress of the other player or decide to move ahead.

Number of Players: 2-4

Age Group: 6 yrs and above

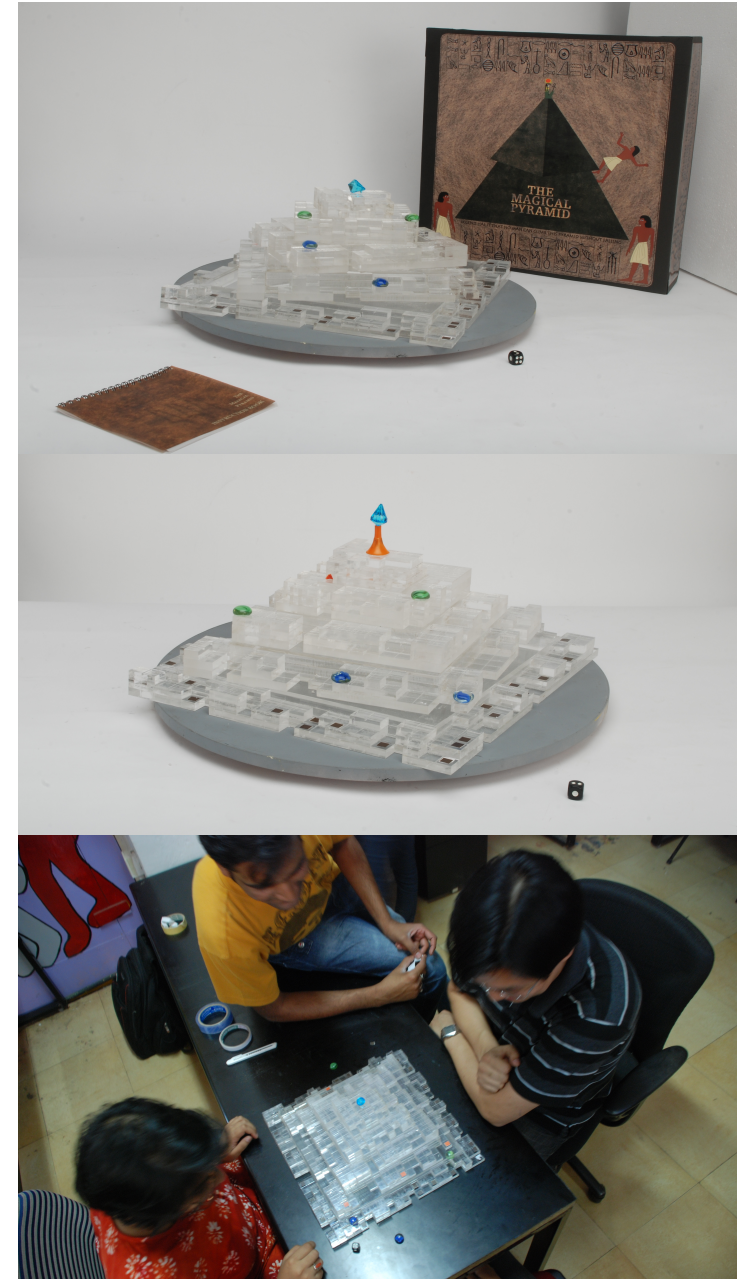

Material:

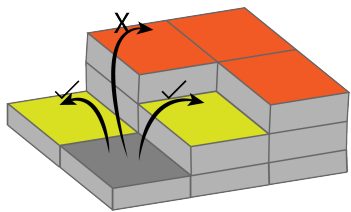

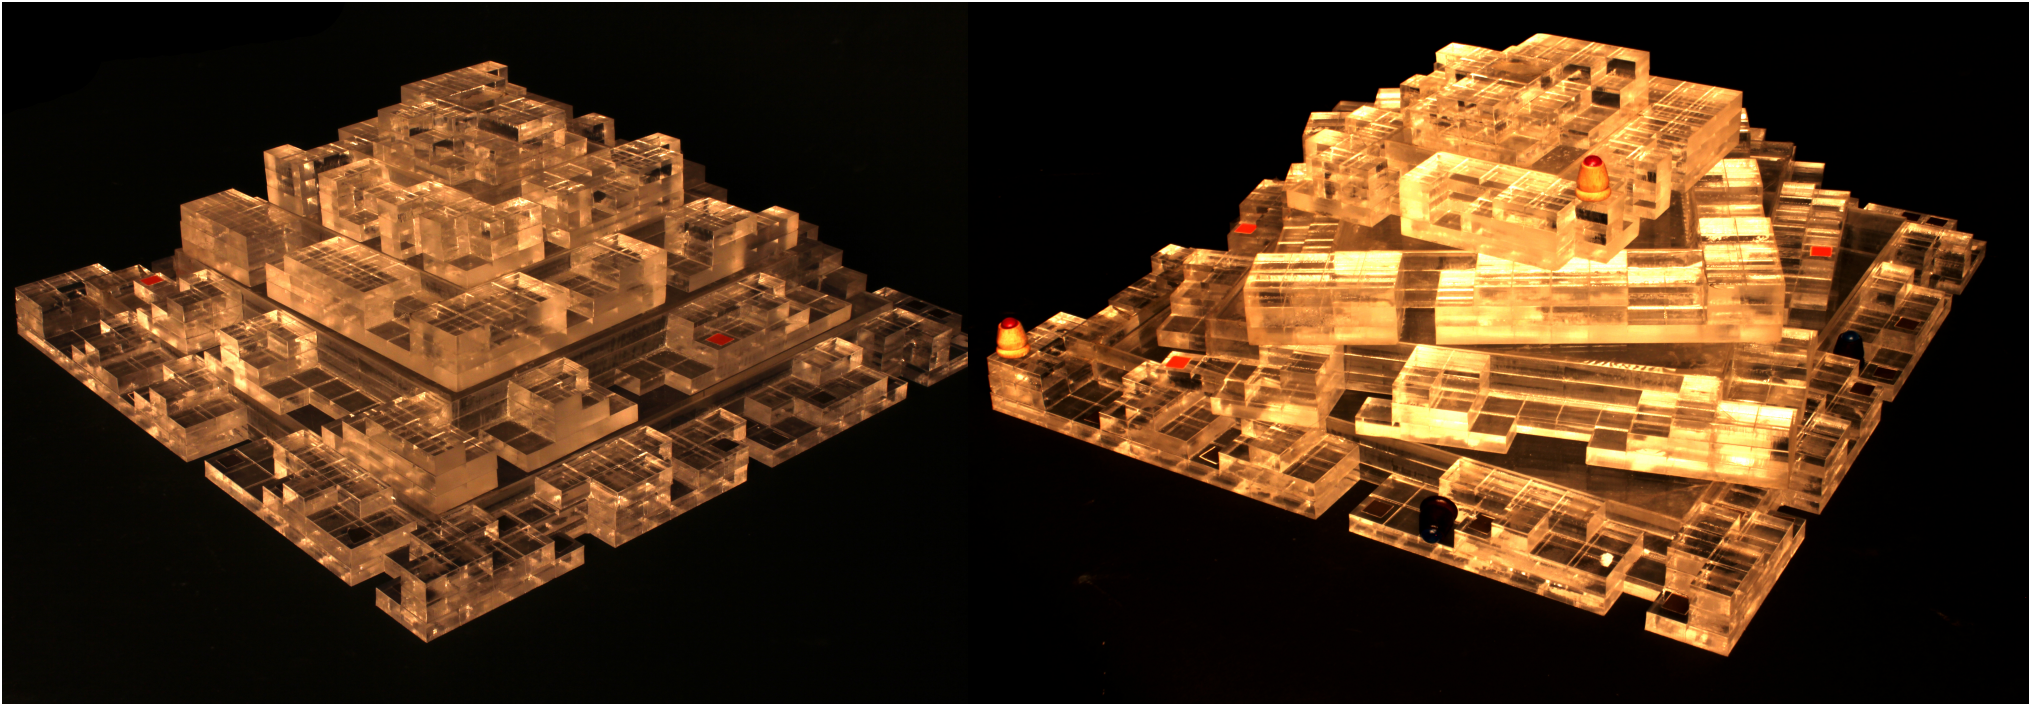

Pyramid – Laser etched acrylic sheets (cork board, wood) mounted on top of each other Or injection moulded layers

Pawns – Carved stones, four colours

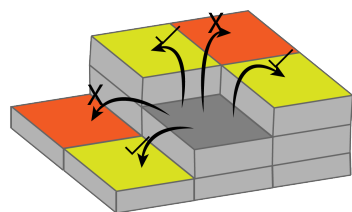

Dice – Carved wooden block

Size -

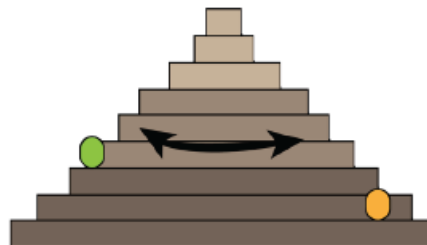

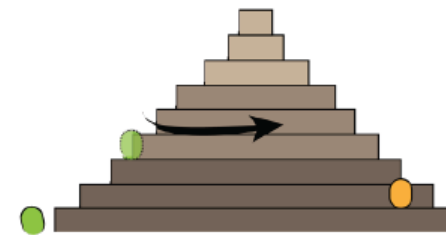

Move only a level in any direction.

Can't move diagonally.

Forfeit a turn to rotate pyramid.

After rotating the pyramid, players have to start from where they land.
